

(b) The two flanks: reach suppressed at diversity the other mechanisms also reach

genotype

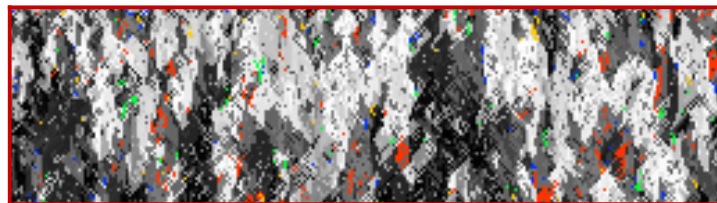

phenotype

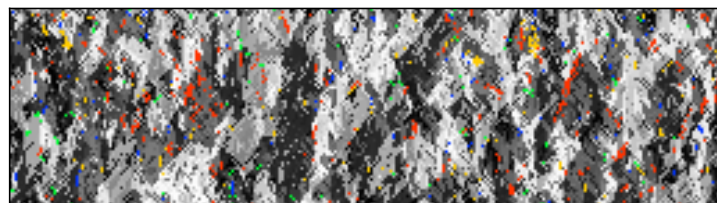

$N=159$
 P_a + replacement noise 0.40 — OVER-MUTATION (causal reach 0.00 cells)

$N=104$
 P_a , asynchronous fraction 0.25 — OVER-PRESERVATION (causal reach 1.22 cells)

$N=111$
braid P_a / two-4-cycle, async 0.75 — OVER-PRESERVATION on a braid (causal reach 0.75 cells)

$N=129$
braid P_a / two-4-cycle, blend 0.70 — CONTROL: propagates at matched diversity (causal reach 3.88 cells)
